

Hear the truth.

JBL® MICRO WIRELESS

Ultraportable, 3-watt speaker with a Li-ion rechargeable battery, built-in bass port and wireless *Bluetooth*® connection

JBL® Micro Wireless

The JBL® Micro Wireless is the first ultraportable speaker featuring a Li-ion rechargeable battery, built-in bass port and wireless *Bluetooth*® connection. With a 40-millimeter (1-5/8") driver, it delivers full-range JBL sound with exceptional bass – yet it fits easily in backpacks or clip onto clothing. You can wirelessly stream audio to the speaker from any Bluetooth-equipped mobile phone or tablet, or use the included audio cable to connect the speaker to any mobile device or MP3 player. You can even daisy-chain with other JBL Micro Wireless speakers for a powerful sonic experience.

Highlights

- *Bluetooth* technology
- Built-in bass port
- 5-hour Li-ion rechargeable battery
- Portable design
- Smart cable design
- LED indicator
- Daisy-chain capability

JBL® MICRO WIRELESS

Mighty Micro

Key Features

Bluetooth® technology

The JBL Micro Wireless portable speaker streams music wirelessly from any Bluetooth-equipped mobile phone or tablet, making JBL sound available for a wide range of portable devices. It's a wireless wonder.

Built-in bass port

JBL speakers are famous for powerful bass. But it might surprise you to hear JBL bass this strong from a speaker this small. A built-in bass port enables the JBL Micro Wireless to generate bass that's superior to comparable portable products.

5-hour, Li-ion rechargeable battery

The JBL Micro Wireless portable speaker has a built-in Li-ion battery that provides up to five hours of playback time. You can easily recharge the battery using a micro USB port, which saves you battery hassles and money.

Portable design

It's easy to get attached to JBL sound. The lightweight, compact JBL Micro Wireless fits easily into backpacks or pockets.

Smart cable design

The JBL Micro Wireless portable speaker is always ready to connect and play. And when your source device isn't connected, the built-in 30-centimeter (11-13/16") audio cable stores in the bottom of the speaker to prevent tangling.

LED indicator

A clearly visible LED lets you know when the built-in Li-ion rechargeable battery is low, so you know when the JBL Micro Wireless needs charging. We don't want you to miss a moment of your music.

Daisy-chain capability

If you want to add some "macro" to your Micro, you can connect the JBL Micro Wireless portable speaker to other JBL Micro Wireless speakers, creating an impressive sound environment.
